MEMORANDUM FOR SUPPLY PROCESS REVIEW COMMITTEE (PRC) MEMBERS

SUBJECT: Approved DLMS Change (ADC) 71B, Administrative Correction for DLMS
Mapping for Materiel Release Order (MRO) Exception Data Transaction (Supply)

The attached change to DOD 4000.25-M, Defense Logistics Management System (DLMS), is approved for immediate implementation. The updated DLMS Supplement will be posted to the DLMSO Web site (<http://www.dla.mil/j-6/dlms0/ICs/Default.htm>) within 15 days from the above date for implementation planning.

The attached change to DLMS will be incorporated into the DLMS manual in a future revision. The Defense Automatic Addressing System Center and DLA have advance authorization to employ these procedures. DLMSO will submit concurrently any necessary revisions to the governing Federal Implementation Convention to the DOD Electronic Data Interchange Standards Management Committee, and the Federal Electronic Data Interchange Standards Management Coordinating Committee.

Addressees may direct questions to the DLMSO points of contact, Ms. Ellen Hilert, Chair, Supply Process Review Committee, 703-767-0676, DSN 427-0676, or email: ellen.hilert@dla.mil or Ms. Aundra Rhone-Jones, DOD MILSTRIP System Administrator, 703-767-3630, DSN 427-3630, or e-mail: aundra.rhone-jones.dla.mil. Others must contact their Service or Agency designated representative.

JAMES A. JOHNSON
Director

Approved DLMS Change 71B
Administrative Correction for DLMS Mapping for MRO Exception Data Transaction

1. ORIGINATOR:

a. Service/Agency: Defense Logistics Agency/DLMSO

b. Originator: Supply PRC, Chair: Ellen Hilert, DLA DLMSO/J-673, Defense Logistics Management Standards Office (DLMSO), 703-767-0676 (DSN 427), ellen.hilert@dla.mil

2. FUNCTIONAL AREA:

Primary: Supply

3. REFERENCE:

a. DLMSO Memorandum, August 7, 2002, subject: Approved DLMS Change 71, DLMS Mapping for DLA Materiel Release Order (MRO) Exception Data Transaction, Document Identifier (DI) Code CGU (Supply)

b. DLMSO Memorandum, September 21, 2004, subject: Approved DLMS Change 71A, DLMS Mapping for MRO Exception Data Transaction (Supply)

4. REQUESTED CHANGE:

a. Title: Administrative Correction for DLMS Mapping for MRO Exception Data Transaction

b. Description of Change: This is an administrative change to adjust the mapping of clear text addressing in the DS 940R, MRO. This change corrects the placement of address lines 3 and 4 when DAAC conversion is required from Component unique DI Code CGU/ZGU. It also corrects the DS to correctly show placement of address line 3 when the clear text address is created in DLMS (i.e., the originating system produces a 940R with the clear text addressing already incorporated as distinct data elements). This change also requires that the country code be used to identify addresses outside the US using the appropriate X12 data element.

c. Procedures:

(1) This transaction will be employed whenever an MRO includes clear-text exception ship-to or pick/pack/delivery instructions or specialized information that must be transmitted from the ICP to a DSS storage activity. Three types of clear text address are addressed in this administrative change as identified by the 2/N101/1100 qualifiers DA, IF and IAD (yellow highlighting indicate changes from previous version):

Rules for ZGU/CGU Address Mapping for DAAS Conversion:

DA (TAC 2) Ship-to	IF (TAC 3) NOA	IAD (TAC M) FMS In country
N102 address line 1	N102 address line 1	N102 address line 1
N201 address line 2	N201 address line 2	N201 address line 2
N202 not used	N202 not used	N202 not used
N301 address line 3	N301 address line 3	N301 address line 3
N302 address line 4	N302 address line 4	N302 address line 4
N4 multiple postal (zip) codes	N4 not used	N4 not used

Mapping when 940 originated in DLMS with address already integrated:

DA	IF TAC 3	IAD TAC M	BSM example
N102 address line 1	N102 address line 1	N102 address line 1	N1*DA*ATTN: DANIEL MENDIOLA
N201 address line 2	N201 address line 2	N201 address line 2	N2*MULTIPLE SCHOOL UNIT, GUAM
N202 not used	N202 not used	N202 not used	
N301 address line 3	N301 address line 3	N301 address line 3	N3*PSC 455 BOX 194
N302 not used	N302 not used	N302 not used	
N401 city N402 state (when applicable) N403 postal code N404 country (when not US) N405 Code IP N406 second Postal Code	N4 city, state, country, postal code	N4 city, state, country, postal code	N4*U.S.NAVAL STATION*GU*96913 Note: GU in this example is the USPS State Abbreviation for Guam, and, therefore, appears in the N402. Country codes must appear in the N404.

(2) Revise the following notes in the 940R, Material Release Order (original unchanged clear text address notes also included to facilitate reading):

Location	Revision	Reason	Federal IC
2/N1/1100	<p><u>Revise DLMS notes at N101:</u></p> <p>DA Delivery Address DLMS Note: Use for MRO Exception Data Transaction to indicate the ship-to clear-text exception address is a MRO Type Address Code (TAC) 2 (ship-to) freight address.</p> <p>IAD Foreign Office Federal Note: Use for MRO clear-text exception data FMS in-country address. DLMS Note: Use when transaction includes Component-unique MRO exception data; may be referred to as MAPAC “TAC M” address. See introductory DLMS note 4e.</p> <p>IF International Freight Forwarder Federal Note: Use for MRO clear-text exception data FMS Notice of Availability (NOA) address. DLMS Note: Use when transaction includes Component-unique MRO exception data; may be referred to as MAPAC “TAC” 3 address. See introductory DLMS note 4e.</p> <p>ST Ship To DLMS Note: 1. Use with code BT for reimbursable material. Use in redistribution orders, material release orders, historical material release orders, disposal release orders, and historical disposal release orders to identify the organization to receive the material, when different from the activity being billed for the material. Use precludes the use of code BS. 2. May be used with clear text address for excess plant property requisitions only. See introductory DLMS note 4e.</p> <p><u>DLMS note at N102:</u></p> <p>Use when transaction includes Component-unique MRO exception data with N101 code DA, IAD, and IF to identify the exception activity name (this equates to address line 1). See introductory DLMS notes 4a and 4e.</p>	Clarification of acronym	No update required
2/N2/1101	<p><u>Note at N201.</u></p> <p>Use when transaction includes Component-unique MRO exception data with N101 code DA, IAD, and IF to identify the exception address information (this equates to address line 2). Includes Mark For/Attention when applicable. See introductory DLMS note 4e.</p> <p><u>Revise N202 note.</u></p> <p>Delete note and close</p>	Correction	No updated required
2/N3/1102	<p><u>Revise note at N301:</u></p> <p>DLMS Note: 1. Use when transaction includes Component-unique MRO exception data with N101 code DA, IAD, and IF to identify the exception address information (this equates to address line 3).</p> <p>3. See introductory DLMS note 4e.</p>	Correction and clarification	No updated required

	<p><u>Revise note at N302:</u></p> <p>DLMS Note: 1. Use when transaction includes Component-unique MRO exception data with N101 code DA, <i>IAD, and IF</i> to identify the exception address information for conversion mapping only. For conversion mapping, this equates to address line 4).</p> <p>2. <i>Do not use N302 for addresses created using the DLMS. Address line 4 with city, state, country information is reflected in the N4 segment using the appropriate data elements.</i></p>		
2/N4/1103	<p><u>Note at N401:</u></p> <p>DLMS Note: Use to identify the city name when transaction includes Component-unique MRO exception data.</p> <p><u>Note at N402:</u></p> <p>DLMS Note: Use when applicable to identify the state when transaction includes Component-unique MRO exception data.</p> <p><u>Note at N403:</u></p> <p>DLMS Note: Use when transaction includes Component-unique MRO exception data for initial postal code associated with the ship-to address.</p> <p><u>Note at N404:</u></p> <p>DLMS Note: Use to identify the country. Data element 1270, Code 85, Country and Activity Code, lists applicable code values. Use when transaction includes Component-unique MRO exception data (when other than U.S.) to reflect the country code. Deleted text: For DLA unique data (formerly associated with DL Code CGU), may reflect DLA 3-position country code. See introductory DLMS note 4e.</p> <p><u>Note at N405:</u></p> <p>DLMS Note: Use when transaction includes Component-unique MRO exception data to identify the secondary (parcel post) nine-position postal code associated with the ship-to address (N101 Code DA).</p>		

d. **Alternatives:** None identified.

5. **REASON FOR CHANGE:** This change supports DLMS implementation. ADC 71 allowed DLA BSM to initiate MRO exception data in a DLMS format and provided mapping for conversion back to the original CGU format. The ADC 71A addendum was required by DSS to receive exception data as initiated by Service ICPs using the ZGU format and DLA ICPs using CGU formats. This ADC 71B is an administrative correction to adjust the mapping of clear text addressing to support both conversion and addressing created under the DLMS. This revision will ensure that the address information is properly communicated.

6. **ADVANTAGES AND DISADVANTAGES:**

- a. **Advantages:** Supports Component-level DLMS implementation.
- b. **Disadvantages:** None identified.

7. IMPACT:

a. Data Content/Procedures: Requires update to DSS.

b. Publication(s): DOD 4000.25-M, DLMS, Federal IC 940R and corresponding DS. The DS revision requires corresponding revision of the Federal IC. All applicable revisions will be submitted to the EDISMC/Logistics Functional Work Group for coordination/approval if needed.
